Inflatable BB Gun Range

\$1,600⁰⁰

Daisy's unique inflatable BB Gun Range is powered by a small fan and inflates in less than one minute for easy setup indoor or outdoor. The range features two shooting lanes with ample room for a shooter and instructor in each position. Designed to be used with BB guns with velocities below 350 fps. Layers of fabric and mesh keep BBs inside the range and provide a more than adequate backstop for the low velocity BB guns. When finished shooting, takedown is just as easy as setup was. The range stores in a large heavy duty bag and can be transported in an SUV or pickup.

⚠ CAUTION: Do not use this range with high velocity multi pump airguns, break barrels, firearms or even airsoft guns with velocities in excess of 350 feet per second. Doing so can cause serious damage to the range and is not safe. Do not shoot pellets in this range.
